

The Education Of The Child

It seems simple enough when we say that we must overcome evil with good, but practically no process is more involved, or more tedious, than to find actual means to accomplish this end. It is much easier to say what one shall not do than what one must do to change self-will into strength of character, slyness into prudence, the desire to please into amiability, restlessness into personal initiative. This book, *The Education Of The Child*, by Ellen Key, is a replication of a book originally published before 1910. It has been restored by human beings, page by page, so that you may enjoy it in a form as close to the original as possible. This book was created using print-on-demand technology. Thank you for supporting classic literature.
